EDUCATION

University of Central Florida

Bachelor's Degree in Computer Science

Relevant coursework: Object Oriented Programming, Discrete Structures, Security in Computing, AI for Game Programming, Web Based IT, AI, Topics in Cybersecurity

Languages: Java, JavaScript, Swift, Python, C, C++, C#, HTML/CSS

Frameworks/Libraries: React, Node.js

Database/Developer Tools: MongoDB, Figma, AWS, Git, VSCode, SCRUM, Blender

WORK EXPERIENCE

Limbitless Solutions Inc. | Frontend Development & Web Design Intern

Jan. 2024 - Aug. 2024

A non-profit organization empowering individuals through personalized, creative bionics.

- Developed the Latest at Limbitless page that combines the News, Blogs, and Press pages to allow for seamless searching. Achieved this with **HTML**, **CSS** and **JavaScript** code that adheres to accessibility standards.
- Took charge of overseeing the updates for several of our outdated pages, most importantly the ENGAGE page to ensure that the users always had up-to-date information.
- Designed user-focused **UI/UX** for Latest at Limbitless page, Tasks page, and Works page to ensure the most optimal designs for our users. Utilized **Figma** for wireframing & prototyping.
- Worked independently and collaboratively with the Web & Design team as a designer/developer to ensure top-grade web pages prioritizing usability, responsiveness, and accessibility standards.

Arboretum, UCF | Web Development Intern

Aug. 2023 - Dec. 2023

Provides opportunities to explore and learn about campus plant life and natural wonders.

- Managed updates & maintenance for the Arboretum website through **WordPress** ensuring content accuracy, functionality, and adherence to brand guidelines.
- Collaborated with UCF Facilities dept. to manage the merging of the Facilities and Arboretum website.
- Supported the media/marketing team with event content creation & social media management. Also contributed to events by volunteering my photography skills to enhance audience engagement and outreach.

PROJECTS

Saturn

- Engineered an AI driven search platform similar to Google Gemini using **React.js** & **Google's API**.
- Rebranded Google Gemini's design into my own using **Figma** to build a more creative, unique design to the basic search engine.
- Implemented searching & chat history recording capabilities in order for a seamless user experience.

Book Stock

- Constructed a book inventory app for book worms to track their book collection as well as receive recommendations based on their current inventory
- Utilized **React.js**, **Firebase**, **OpenAI API** as well as **Node.js** to build a full-stack application that handles information retrieval, storing, & recommendation generation.

ASIS: Accenture Lab Assistant

- Worked on a AI based project sponsored by Accenture that worked to simplify the lab processes used by scientific researchers. Achieved this by interconnecting the different lab machines so that they could be controlled through one platform.
- Mainly focused on the **Frontend** component (Voice Lab) through Lab flows that ran the whole process & assisted with some backend using **JavaScript**.
- Led the team as the **project manager** using **Agile** development processes with **Jira**.
